PROFESSIONAL SUMMARY

Junior software developer with hands-on experience building production level React applications and custom web tools. Strong frontend foundation with growing full-stack skills, including API integration, authentication, and admin dashboards. Actively expanding computer science fundamentals through Harvard's CS50 while applying skills to real business applications. Seeking a junior developer role with mentorship and long-term growth opportunities.

TECHNICAL SKILLS

Languages: Javascript (ES6+), HTML5, CSS3

Frontend: React, Component Architecture, Props & State, Tail CSS, Responsive UI

Backend & APIs: Rest APIs, Authentication Concepts, CRUD Workflows, Admin Dashboards

Tools: Git, GitHub, VS Code, AI-assisted Development

PROJECTS

CUSTOM LED BUILDER - LED JUNGLE

- Built a live, production ready custom LED sign builder used for real customer orders
- Implemented character-count pricing logic tied to font, size, and layout
- Developed line spacing, font selection, and color options for responsive previews
- Designed real-time UI updates and scalable component architecture

WEBSITE & ADMIN DASHBOARD - SIGN AVENUE LLC

- Developed a business website with secure email/password authentication
 - Created an admin dashboard for project tracking and scheduling
 - Handled contact requests and internal project workflows
 - Integrated frontend interfaces with backend APIs
-
